Mr. Gadget -DonW-

There are lots of FUN and Interesting Gadgets that populate the Internet.

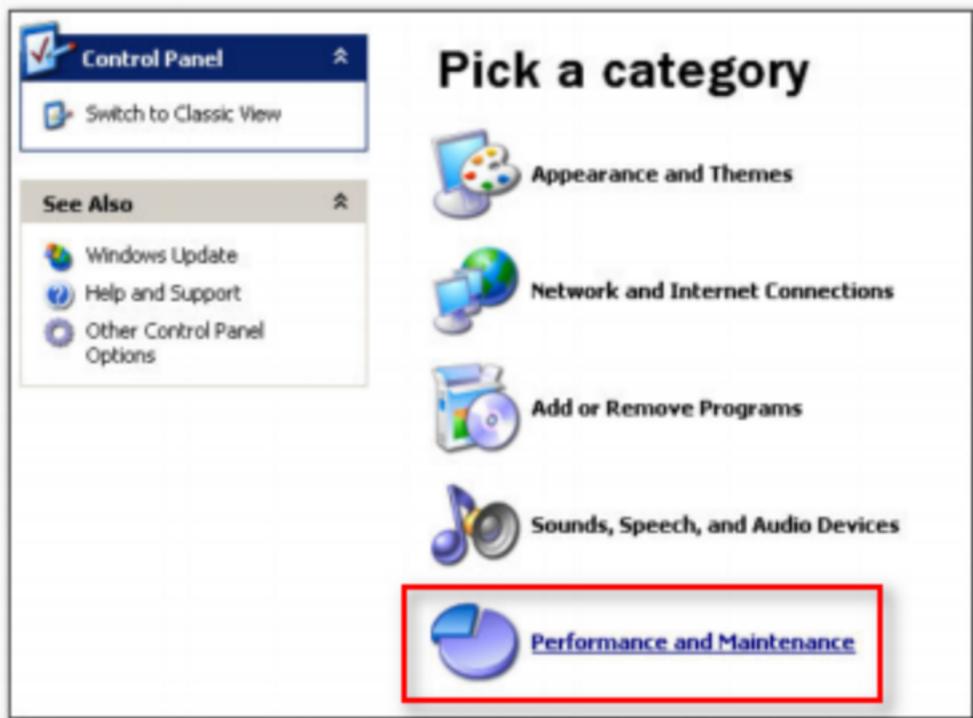

I select just a few of them to present to you at the CUGG Saturday meeting

Control Panel - XP - "Basic Computer Info"

Goto the
TOOL Bar

Then Click
on Start

To get here

Control Panel - XP - "Basic Computer Info"

The screenshot shows the Windows XP Control Panel window for "Performance and Maintenance". The address bar at the top reads "Address Performance and Maintenance". On the left side, there are two expandable sections: "See Also" containing "File Types" and "System Restore", and "Troubleshooters" containing "Startup and Shutdown". The main content area is titled "Performance and Maintenance" and features a large heading "Pick a task...". Below this heading is a list of tasks, each with a green arrow icon. The first task, "See basic information about your computer", is highlighted with a red rectangular box and has a mouse cursor hovering over it. Other tasks include "Adjust visual effects", "Free up space on your hard disk", "Back up your data", and "Rearrange items on your hard disk to make programs run faster". At the bottom of the page, there is a heading "or pick a Control Panel icon" followed by two icons: "Administrative Tools" (represented by a folder icon) and "Scheduled Tasks" (represented by a folder icon with a clock).

Address Performance and Maintenance

See Also

- File Types
- System Restore
